

Proudly Made in the USA

*DuraTab proudly announces its' "XE" process control series tablet
for
X-extreme Environment Conditions*

Specifically designed for process controls in harsh environmental conditions .

DuraTab's "XE" tablet was designed to allow users the ability to work free from worry in harsh environments. The solid cast aluminum case serves to protect processing functions from dust, dirt, water, and heat. A powerful processor, sealed from outside elements, allows for fast response while generating minimal heat. Storage space is never a problem with the full range of hard drives from 20GB to 80GB. The large 12.1 LCD touch screen needs only your finger to operate. There is no need for a digital pen or special stylus. The optional touch screen transparent keyboard was designed for ease of use and accuracy..

The rechargeable Lithium battery has a range from 6 to 7 hours of usage. All these features packaged within a solid cast aluminum case **with no fan** and sunlight readable LCD screen.
